

Jordan wishes to offer private investors/operators the opportunity, through an international competitive bidding process, to enter a concession to design, build, finance, operate, maintain and transfer new terminal and ancillary facilities for passenger and cargo at the King Hussein Bridge to replace the existing Jordanian based facilities ("Project").

MPWH has appointed the International Finance Corporation ("IFC") - a member of the World Bank Group, acting through its Public Private Partnerships Transaction Advisory Services division (IFC Advisory), as Lead Advisor to assist in the structuring and implementation of the Project.

MPWH now invites interested parties with proven experience in investing and operating passenger and cargo facilities internationally, as well as local entities interested in forming a consortium, to submit a non-binding written Expression of Interest on or before 9 a.m. (Amman time) on 27 May, 2020, to be received <u>at the two email</u> addresses below.

Further written information and requirements will be provided to registered parties once requested via the two email contacts below.
